PREFACE

The *Air University Periodical Index* is a subject index to all significant articles, news items and editorials appearing in 71 English language military and aeronautical periodicals not indexed in readily available commercial indexing services. The *Index* originated with 23 titles as a quarterly publication in 1949 and has continued on a quarterly basis superseded by annual and triennial cumulative issues. Staff members in the Reader Services Division of Air University Library index the periodicals with the exception of 10 titles which other Air Force, Army, and Navy libraries contribute. The *Air University Periodical Index* serves primarily the educational and research programs of Air University. The *Index* is available to other libraries on exchange basis.

This publication has been reviewed and approved by competent personnel of the preparing command in accordance with current directives on doctrine, policy, essentiality, propriety, and quality.

ARRANGEMENT

The subject entries are constructed on the direct entry principle. Most sponsor agency entries under U.S. have been eliminated and entry is directly under subject agency, e.g., STRATEGIC AIR COMMAND, not U.S. AIR FORCE. STRATEGIC AIR COMMAND. Specific military services of various countries are entered under their name, followed by the name of their country, e.g., AIR FORCE--Great Britain; ARMY--United States.

Material on aircraft by name has been placed under the headings AIRPLANE TYPE; HELICOPTER TYPE; MISSILE TYPE. Space vehicles by name have been placed under the heading SPACE PROJECT.

AERONAUTICS here embraces the technical and technological aspects of aviation and aircraft; AVIATION the art of flying, both military and civilian; and AIRLINES the commercial transportation companies; FLYING popular, nontechnical articles on the pleasures of flying.

Government departments are listed alphabetically by department title, e.g., DEFENSE DEPT.--United States, not DEPARTMENT OF DEFENSE.

Author entries are included for admirals, generals, Dept. of Defense officials, and others who are prominent in some field of Index interest.

Organization's abbreviation, if it is a national term, is used not only as a cross reference (e.g., NATO see NORTH ATLANTIC TREATY ORGANIZATION) but also as geographic subdivision (e.g., DEFENSES--NATO). Abbreviations are listed at the beginning of their alphabetical section. However, the artificial words SAGE and TACAN are accepted as normal words and are so alphabetically listed.

Reviews of books are grouped under BOOK REVIEWS.
